

BROADHEAD

A COMPLETELY NEW TERMINAL BALLISTIC DESIGN TECHNOLOGY FOR HUNTING

- ❑ Material - special soft **steel**, allows **controlled deformation** at the moment of impact. Environmentally friendly - **lead free** material provides clean **wounds without small particles**
- ❑ Durable low friction polymer ensures safe passage through **any type of choke** and **reduced fouling** in the bore, also making the slug suitable **for rifled barrels**
- ❑ Protective coating - **resistant against corrosion** during storage
- ❑ **Worlds largest expansion diameter - 1.4 inches** - largest available on the market
- ❑ Strong shape for controlled expansion and **transfer of energy**
- ❑ 6 regular **fragments with sharp razor-like edges impact in a large area** - a cone 12 inches in diameter
