

# BROADHEAD

**Devastator EXPANDING STEEL SLUG**

**Field load 1<sup>1</sup>/<sub>16</sub> oz / 300 gr.**

# NEW!

# 20 GA 2<sup>3</sup>/<sub>4</sub>"

Broadhead expanding slug line is designed for big game hunting. The concave ogive of the slug provides fast expansion and powerful shockwave. Broadhead slugs fragment after the hit providing deep-penetrating main body and 6 detached fragments that impact in a large area.

### POLYMER BEARING BANDS

Low friction polymer bearing bands prevent contact with the bore and damage to choke surfaces

### SMOOTH AND RIFLED BARRELS

Slug design suitable for both smooth bore and rifled barrels, any type of choke

### SHAPE

Ideally centered

### AERODYNAMIC SHAPE

Advanced aerodynamically balanced shape assures stability and accuracy

### EXPANDING PETALS

Six razor - sharp cutting edges provide double diameter expansion then fragments to assure deep penetration and maximum energy transfer

### LARGE EXPANSION

1 inch expanding diameter one of the largest available on the market ensures powerful hydrodynamic shockwave

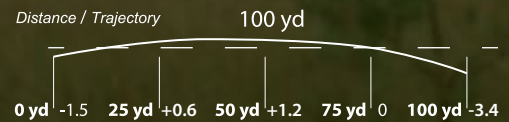

### POLYMER WAD COLUMN

Durable, one-piece wad column seals off hot propellant gasses then travels with slug adding its weight to the impact energy

Impact with fragments in a large area creates massive damage to vital organs

1. Fast expansion at the first moment of impact
2. Expands to maximal diameter, forms steady shape and creates powerful shockwave
3. Creates 7 wound channels – combined impact with 200-grain main body and 6 petals with sharp razor-like edges
4. No over-penetration – 100% effectiveness – all energy transferred to the target.
